In the thesis The Theory of Translation and Linguistics we discuss some of the aspects of general linguistics, applied linguistics, text linguistics and psycholinguistics for the theory of...

(PDF) The Theory of Translation and Linguistics
Translation refers to the carrying or communication of the meaning of a text from one language to another. This, to convey the original tone and intent of a message in the target language, while exhibiting sensitivity towards cultural and regional differences between source and target languages.

The Linguistic Approach to Translation | One Hour Translation
Linguistics plays an important role in the translation of a document from one language to another. Translating information includes more than just changing each word from the original language to another. One must also decode and decipher all the facets and functions of the original language into the new language.

The Role of Linguistics in Translation - ITC Translations
The main concern of translation theory is to determine appropriate translation methods for the widest possible range of texts3 and to give insight into the translation process, into the relations between thought and language, culture and speech. There are several aspects of this branch of linguistics: • General theory of translation, whose object is general notions typical of translation from any language.

THEORY OF TRANSLATION
Translation is transmitting a text from a language to another while maintaining. Like good morning to translate it in Italian it would be Buongiorno. Translation is a branch of applied linguistics where we study best approaches for translation on the levels of word, syntax, and text. (less) flag.

A Linguistic Theory of Translation by J.C. Catford
Clearly, then, any theory of translation must draw upon a theory of language — a general linguistic theory. General Linguistics is, primarily, a theory about how languages work. It provides categories, drawn from generalizations based on observation of languages and language-events.
