The norm for a construction manager is a bachelor's degree in building science, construction engineering, construction management or civil engineering. Employers will look for a construction manager who has work experience, according to the U.S. Bureau of Labor Statistics ( [www.bls.gov](http://www.bls.gov) ).

## **Construction Manager vs. Architects ... - Civil Engineering**

Having said that in my opinion as a newcomer it can be invaluable to work in construction for 2-3 years before going to an office job. It's amazing how many planners I've met that don't have a clue about real life conditions and civil engineering isn't just some highly theoretical thing, even if you do more theoretical structural design.
