Travel Professor - Gdansk, Poland and Tourism Networks

What are clusters and networks? Clusters and networks are different yet linked phenomena. Clusters are agglomerations of interconnected companies and associated institutions. Firms in a cluster produce similar or related goods or services and are supported by a range of dedicated institutions located in spatial proximity, such as business associations or training and technical assistance ...

Clusters and networks development | UNIDO

Therefore, clusters and networks have essential role in generating SMEs competitiveness in global markets (Audretsch, 2003). Main input to improve the enabling environment for developing competitiveness, that is a requirement for globalization, are clusters and networks because they create a conducive economic climate for SMEs.

Promoting Clusters and Networks for Small and Medium ...

Abstract. This paper argues that the primary drivers of innovation for micro enterprises in clusters are human factors sharpened through business processes (including learning by seeing and learning by doing), market sources (backward, forward and horizontal linkages) and market sophistication (size of the firm and nature of the buyer), in that order.

Micro-clusters and networks : the growth of tourism (eBook ...

Today's economic climate is dominated by inter-firms networks, which have become powerful instruments for building economic capacity for regions to compete in the global market place. Industry clusters are recognised as playing a significant role both in regional economic development and in improvements to quality of life. The aim of this paper is to investigate this influence and to tackle ...
